Historical GIS Skills Workshop: Projections and Coordinate Systems in GIS

Thursday, March 22, 2012
3:30 pm

When working in GIS some knowledge of projections and coordinate systems is necessary to prevent problems and sometimes even to enable your spatial data to show up in your map.

In this workshop, UNC's GIS Librarian Amanda Henley will introduce the essential concepts the non-specialist needs in order to use projections and coordinate systems effectively in GIS work.

Location: Davis Library 247

Contact: Adam Domby (adomby@email.unc.edu) or Amanda Henley (ahenley@email.unc.edu)
